イスラエル主力戦車マガフ6Bガル・パタシュ

強国に注目されたイスラエルはつい強大な戦闘力を発揮できる国の一つです。イスラエル人も賢いことで世間に知られて、いつも手元の軍備を上手く利用しています。戦争において鹵獲されたヨルダン陸軍、ドイツ軍とアメリカ軍のM48とM60パットン戦車がいろいろな欠陥が発見されたり、バリエーションもたくさんあったりしましたが、イスラエル軍は全部受け入れました。そして、それらをマガフと呼ばれます。

マガフ6、7とはM60シリーズということです。その中に、M60A1E2にイスラエル軍はマガフ6Bの名称を与え、独自の改修を加えました。普通はFN MINIMI機関銃を追加、主砲の上にM2HB重機関銃を換装しました。それ以外、M48/M60戦車の防御力を高めるために、重増加装甲を配備し、馬力908hpのエンジンに換装しました。1980年代から、チーフテンとマガフはだんだんメルカバ主力戦車で代えてきましたが、一部のマガフは21世紀になってもまだまだ現役で使用するようになりました。その間、マガフに対する改修が実施されました。マガフ6Bガル・パタシュという名称は目立つようになるでしょう。ガルとは火力管制装置の名前で、パタシュとは“日常治安維持任務”の略です。名前の通り、もともと西ヨーロッパの作戦においてソ連装甲車に対抗できた戦車は中東の低強度紛争に投入されました。戦車数は非常に少なく軍に内緒されていたので、マガフ7または8と間違える可能性が高いです。戦車としてのマガフは2006年全部退役しましたが、シャーシだけ用いられています。

Israel Main Battle Tank Magach 6B GAL BATASH

It seems that small countries surrounded by strong enemies can often win the victories with unexpected fighting power, and Israel is one of them. Israelis have been famous for their sagacity, and they can utilize their resources to the utmost. M48 and M60 Patton tanks came to Israel with the wars. Some of them were captured from the Jordanian army and some of them were sold by West Germany and the U.S. Though those tanks were of various variants, and many shortcomings were exposed in the battlefields, Israelis still took all of them and designated them Magach.

Magach 6 and 7 tanks are based on the M60 tanks. Magach 6B is the Israeli name of the M60A1E2. Like what they did to other imported AFVs, the Israelis have applied various upgrades on the M60A1E2. They replaced the machine gun with the FN MINIMI machine gun and added the M2HB heavy machine gun on top of the main gun. In response to the complaints about the protection of M48/M60 tanks, the IDF installed add-on armor on it. What's more, they also upgrade the tank's engine to be a 908hp one. Since the 1980s, the Sho't and the Magach tanks were gradually replaced by Merkava main battle tanks. But a large number of Magach tanks continued their service to the 21st century. Even at the end of its service life, the upgrades on Magach didn't stop. One of these tanks has a very eye-catch name, the Magach 6B GAL BATASH. The GAL in the name comes from an Israeli fire-control system. And BATACH is an acronym for "overall security" in Hebrew. Obviously, after receiving the ingenious upgrades by the Israelis, this tank, which was designed to counter the Soviet armor groups in West Europe, now plays a role in the low intensity security conflicts in the Middle East. There were only a very small number of Magach 6B GAL BATASH tanks, and they were kept under strict confidence. Sometimes they were mistaken for Magach 7 or Magach 8. By 2006, all Magach tanks were removed from military service. However, other vehicles based on its chassis are still serving in the IDF.
